*Instructions & Support Materials* files in Microsoft Word™ format contain a series of documents that provide guidance on how to prepare a permit application. Although we recommend that you print out the entire package, you may choose to print specific documents by selecting the appropriate page numbers for printing.

*Permit Applications* in Microsoft Word™ format must be downloaded separately. Users with Microsoft Word™ 97 or later may complete these forms electronically.

Permitting packages in Adobe Acrobat PDF™ format combine *Permit Applications* and *Instructions & Support Materials* in a single document. Adobe Acrobat PDF™ files may only be viewed and printed without alteration. *Permit Applications* in this format may not be completed electronically.

**1. What is the purpose of these permits?**

This permit is intended to protect public health, safety and the environment by comprehensively regulating modifications to the design and construction of facilities for the storage, transfer, processing, treatment or disposal of solid waste. Solid waste management facilities must be designed and constructed to prevent pollution of land, air and water and to prevent nuisance conditions.

These permits are issued for approvals of modifications to previously approved (permitted) solid waste management facilities. These approvals include, but are not limited to, modifications of design plans, construction, facility operation, maintenance and corrective actions.

Legislative authority for this permit is stated in MGL c. 21A, ss. 2 and 8, c. 111, s. 150A and the Acts of 1987 c. 584. Authority for the Class II Recycling Program may be found at M.G.L. 25A Section 11F(d). Regulations promulgated pursuant to these laws are codified in 310 CMR 19.000, Solid Waste Management Regulations.

**2. Who must apply?**

Any individual, business or organization intending to modify a previously approved (permitted) solid waste management facility – except for a transfer station that is subject to the certification process under 310 CMR 19.029(4) – must apply for this permit modification in accordance with 310 CMR 19.029(2) or (3).
